

Audiology Assistant Exam Blueprint

PREAMBLE

The audiology assistant supports the audiologist by engaging in tasks that are planned, delegated and supervised by the audiologist. In so doing, the audiology assistant provides exceptional patient care, performs hearing device maintenance, and enhances the productivity of the audiology practice to improve patient experiences and services in accordance with local, state, and federal regulations. ASHA’s certification exam for audiology assistants will test an applicant’s knowledge, skills, and abilities on the tasks listed herein.
